

Rotary Server with Vision Panel

- Bullet Resistant Level 1 Protection
- Drum Rotates 180 Degrees
- Vision Panel Allows View of Contents Before Drum is Turned

The Rotary Server with Vision Panel is constructed of stainless steel, bullet resistant plastic, and 1-1/4" Level 1 acrylic for the vision window. The unit rotates 180° by turning the crank handle. In the locked position the stainless steel drum is turned to the customer for maximum security. Vision Panel allows for viewing contents. Unit is weatherstripped for outdoor use and provides Level 1 bullet resistant protection. Drum extends behind and in front of the unit, and is 15-1/4" in diameter. Interior will hold larger items such as a six pack of beverages, or a gallon of milk.
